Close to 100 Close to one hundred Close to 100

How to Play: Each player needs a Close to 100 sheet. Using one dice (preferably a 10 sided dice) player 1 rolls the dice and decides to use the number rolled as ones or tens. Eg: if a 3 is rolled the player can place the number in the ones and write 3 or place it in the tens and write 30. The next time that player rolls they add the number chosen to the previous total. eg: if 3 tens was chosen on the first roll and a 5 was rolled on the second turn, the player could decide to use it as 5 ones so the total in the 2nd line would become 35 After each player has had 7 turns, the player that is closest to a total of 100 is the winner.
