Close to TEN Close to TEN Close to TEN Close to TEN

How to Play: Each player needs a Close to Ten sheet. Using one dice (preferably a 10 sided dice) player 1 rolls the dice and decides to use the number rolled as ones or tenths. Eg if a 7 is rolled the player can place the number in the ones and write 7 or place it in the tenths and write 7 tenths. The next time that player rolls they add the number chosen to the previous total. eg: if 7 tenths was chosen on the first roll and a 3 was rolled on the second turn, the player could decide to use it as 3 ones so the total in the 2nd line would become 3.7 After each player has had 7 turns, the player that is closest to a total of 10 is the winner.
